Experience

- Sep 2022 – Present 📍 Remote

Freelancer
mertcankose.com

As a freelancer for a while, we have taken and implemented various works with a team that I have both recruited from outside and formed with my close software developer friends. You can find his portfolio of work on my website.

- June 2022 – July 2022 📍 Ankara

UI Developer (Intern)
Jotform

During my 1 month internship, we developed an NPS Tool web application with a talented software developer in the Growth Tools Interns team. I played a big role in the dashboard side of the project and at the same time, I made a presentation about our project to the growth team and managers in the company. Since the projects in the company are in monorepo, I had an idea about all the projects and learned how to develop a quality project within a large project and team.

- Jan 2022 – April 2022 📍 Gebze/Kocaeli (Remote)

Software Developer(full-time)
Open Money

Due to my interest in the blockchain field, I worked as a software developer at one of the few companies doing this job in Turkey. As a result of the short time I have been working, I have developed the mobile application of 2 projects.

- Nov 2020 – Jan 2021 📍 Istanbul (Remote)

Frontend Developer(Intern)
Gais Security

I was looking for a place where I could work as a volunteer to avoid being empty during the pandemic period, and I started working at this firm. In as little as 3 months, I learned about react and vue technologies and became involved in the company's products, and for the first time, parts of the product that I developed were published in the production environment.

- March 2019 – Sep 2020 📍 Ankara

Crew Member
Vision to Mission
Entrepreneurship Club

I co-founded a community under the name VIMTECH in the Engineering Faculty of the community, where we organized a game course. I have worked in the fields of instructor search, course promotion and course continuity. Course continued for 4 weeks. I have done technical team leadership, catalog design in various organizations of the community. Also, I developed the community websites using WordPress.
