

Mertcan Köse

Software Engineer

Profile

As a software engineer, I solve problems by thinking about both the **technical side** and how **users** will see the solutions. My experience in **different areas** helps me understand how users behave. In my work, I focus more on the **product** than on the code itself. This has led to **successful outcomes** in my career.

Experience

Valentura Technology & Investment

Software Engineer (Mobile, Web, Blockchain)

May 2022 - July 2024

- Expert in **web and mobile** tech, creating intuitive UIs across diverse projects.
- Strong communicator and **mentor**, key in recruiting and developing intern talent.
- Drove company success through **smart development decisions** and staying current with industry trends.
- Contributed to **blockchain and web3** projects, expanding into decentralized tech.

TÜBİTAK Uzay

Intern (Network & SAP)

July 2023 - Aug 2023

- Interned at TÜBİTAK Uzay, working on **network, system**, and SAP software.
- Gained crucial insights into internal and **software security** practices.

Jotform

Intern (UI Developer)

June 2022 - July 2022

- Developed an NPS Tool web app as part of the **Growth Tools** Interns team during a one-month internship.
- Created and **presented** the project's dashboard to the company's growth team and managers.
- Gained experience working in a **mono-repo structure**, contributing to diverse projects within a large team environment.

Open Money

Software Developer (Mobile, Blockchain)

Jan 2022 - April 2022

- Pursued my interest in **blockchain** by working as a software developer at one of **Turkey's few companies in this field**.
- Developed **mobile applications** for two projects during my brief tenure.

Gais Security

Software Developer (Web)

Nov 2020 - Jan 2021

- Secured a volunteer position at a firm during the pandemic, quickly mastering **React and Vue** technologies in just 3 months.
- Contributed actively to company products, with my work being **published in the production environment for the first time**.
